BROWARD COLLEGE ACADEMY FOR EXCELLENCE (BCAE) PROGRAM

BCAE teaches entering students how to be successful in college and achieve their goals.

The Broward College Academy for Excellence Program will help students discover how they learn best and teaches them valuable study skills.

STUDENTS - YOU WILL HAVE A BETTER CHANCE AT:

Success with BCAE

Studies have shown that this model provides students a much higher chance of finishing community college and transferring to a bachelor degree program. Spending one semester in BCAE is an investment in their success in college and life.

Finding direction

Unsure of what classes to take? Broward College advisors and peer advocates will help students map out their path using educational and career planning.

Becoming an effective person

BCAE will assist students in becoming organized and being punctual. They will find out how to break down big projects into manageable pieces and handle stressful situations.

Standing out in the job market

After one semester in BCAE, student participants have increased confidence and better communication skills. Students will also know how to use several computer programs and make effective presentations.

Becoming a leader

BCAE students are taught leadership techniques usually reserved for the top executives of Fortune 500 companies. Student participants learn how to build and manage a team, and keep projects on track. BCAE will help students see that they have the ability to make a difference in the community.

THE PROGRAM STARTS
June 25, 2012

HOW DOES BCAE WORK?

BCAE has identified several practices that help students learn and boost student success.

Learning communities

Students take all of their BCAE classes with the same group of students for the entire semester. After spending time together, students really get to know one another, and the friendships formed will help support them through the program and beyond. Many BCAE students report that their community of learners become family.

Interactive learning

If your idea of college is suffering through long, boring lectures, then think again. BCAE instructors are constantly engaging you, and asking you what you think. Many exercises are hands-on and interactive. BCAE is fun!

Integrated classes

BCAE classes are integrated. Behind the scenes, your BCAE instructors are meeting together and coordinating assignments. This means students never have major assignments due at the same time, which makes college success much more achievable. Your BCAE instructors work together to maximize students' learning.

Just-in-time learning

As soon as you learn a new skill in a BCAE class, you will immediately put it to use. For example, you will learn a computer software in one class and learn to create documents using that software in another class. This way, you apply what you learn right away, and you know what you are learning is actually useful.
